

SuRIA Home 2026 Checklist

Use this checklist before signing a rooftop solar package or preparing for the SuRIA Home rebate process.
The rebate is first-come, first-served and subject to official allocation availability.

Official rebate RM600 per kWac	Maximum amount RM3,000	Programme period 1 Jun 2026 to 31 Dec 2026
--	----------------------------------	--

Before You Apply

- ☐ I am a Malaysian citizen.
- ☐ My TNB account is under a domestic residential customer, not a company or commercial tariff.
- ☐ The TNB account name, registered email and bank account details are correct.
- ☐ My solar PV system will be installed under Solar ATAP.
- ☐ I have not received a previous SolarIS cash rebate.
- ☐ My installer can explain the Solar ATAP submission and TNB commissioning process.
- ☐ My system can be successfully commissioned with TNB by 31 December 2026.
- ☐ I know my declared installed capacity in kWac.
- ☐ I understand the rebate is RM600 per kWac and capped at RM3,000.
- ☐ I have checked whether any extra discount is an installer promotion, not the official government rebate.
- ☐ I will keep my quotation, Solar ATAP documents, commissioning details and TNB email.
- ☐ I have checked the latest official information from SEDA or TNB before proceeding.

Questions To Ask Your Solar Provider

- Is this quote based on the official SuRIA Home rebate only, or does it include a private promotion?
- Who handles the Solar ATAP submission, commissioning and follow-up with TNB?
- What happens if the SuRIA Home allocation is fully used before my system is commissioned?
- Is my system size based on my actual usage, or only designed to reach the rebate cap?

Important note: This checklist is for general education only. SuRIA Home terms, allocation and procedures may change. Always refer to official SEDA and TNB sources before making financial or installation decisions.
